

SIVA SURYA P

AI Engineer — LLM Applications & Multi-Agent Systems

✉ sivatechie17@gmail.com 📞 +91 9087474500 🌐 Portfolio

🔗 LinkedIn 🐙 GitHub <> LeetCode

SUMMARY

Final-year B.Tech IT student focused on applied AI engineering: building LLM-powered multi-agent systems, RAG pipelines, and vector-search applications. Hands-on experience with LangGraph/LangChain agent orchestration, ChromaDB semantic retrieval, Gemini API integration, and computer vision with OpenCV/MediaPipe. Strong Python and full-stack engineering foundation, with a track record of shipping complete, demo-ready AI products end to end.

EDUCATION

Sri Shakthi Institute of Engineering and Technology, Coimbatore

B.Tech Information Technology — CGPA 8.23/10 (up to 5th SEM, ~82.3%) | Expected 2027

Bishop Ubagarasamy Matric Hr. Sec. School, Tirupur

HSC — 85% | 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

AI/ML & LLM Engineering: LangGraph, LangChain, RAG Pipelines, Vector Embeddings, Prompt Engineering, Gemini API Integration, Multi-Agent Orchestration, Intent Classification

Computer Vision: OpenCV, MediaPipe, Hand Landmark Detection, Real-Time Gesture Recognition

Data & Analytics: ydata-profiling, Pandas, Data Quality Scoring, Streamlit, Plotly, Automated Reporting

Backend & APIs: FastAPI, Node.js, Express.js, REST API Development

Databases: ChromaDB (Vector), MongoDB, SQLite, MySQL

Developer Tools: Git, GitHub, Docker, CI/CD Basics, Postman, Unit Testing

Core Competencies: Data Structures & Algorithms, OOP, Distributed Systems, Clean Code, Debugging & Troubleshooting, Code Review, Problem Solving

Soft Skills: Communication, Logical Thinking, Collaborative Mindset, Quick Learner

PROJECTS

Chronicle — AI-Powered Code Decision Archaeology Tool | Multi-Agent | RAG

🐙 GitHub · 🚀 Live Demo

- Built a LangGraph-orchestrated multi-agent pipeline that traces GitHub commit/PR history to extract, verify, and cite the reasoning behind past code decisions.
- Designed a staleness-verification agent that cross-checks past decisions against the current codebase, returning confidence-scored, cited answers.
- Implemented a vector-embedded knowledge base (Chroma) for fast semantic retrieval across repo history, with real-time agent progress streaming via Socket.io.

Tech Stack: Python, FastAPI, LangGraph, LangChain, Chroma, Node.js, Express.js, MongoDB, GitHub API, Socket.io

NulAware AI — Interactive Data Profiling & RAG Assistant | LLM + RAG

🐙 GitHub · 🚀 Live Demo

- Built an AI-powered data profiling assistant (Streamlit) supporting CSV upload, automated dataset profiling, and natural-language Q&A over datasets.
- Designed a RAG pipeline: chunked dataset metadata (summaries, columns, correlations, outliers) and embedded/stored it in ChromaDB; built a LangGraph agent with intent classification and conversational memory, powered by the Gemini API.
- Delivered an interactive Plotly analytics dashboard and automated PDF report generation with an AI-written executive summary; persisted sessions in SQLite.

Tech Stack: Python, Streamlit, LangGraph, ChromaDB, Gemini API, ydata-profiling, Plotly, SQLite, ReportLab

Cursor Movement by Hand Gesture | Computer Vision

🐙 GitHub

- Built a computer vision application enabling hands-free mouse control using real-time hand gestures captured through a webcam.
- Used hand landmark detection to track finger movements and mapped them to cursor actions (move, left-click, right-click, double-click, scroll), applying human-computer interaction principles.

Tech Stack: Python, OpenCV, MediaPipe, PyAutoGUI, NumPy, Webcam (Computer Vision)

CERTIFICATIONS

- Prompt Engineering — DeepLearning.AI
- Microsoft AI Fundamentals — Microsoft
- Java Professional Course — Infosys Springboard

AREAS OF INTEREST

AI/ML Engineering | LLM & Agentic Systems | Retrieval-Augmented Generation | Computer Vision
