

SIVA SURYA P

Software Developer | Full Stack Engineer

✉ sivatechie17@gmail.com ☎ +91 9087474500 🌐 Portfolio

🔗 LinkedIn 🐙 GitHub ⚡ LeetCode

SUMMARY

Final-year IT student skilled in full-stack development (React, Vue, Redux, Node.js), DSA, and OOP, with hands-on experience building AI-orchestrated multi-agent applications, responsive UIs, and scalable backend APIs. Strong debugging and collaborative problem-solving ability.

EDUCATION

Sri Shakthi Institute of Engineering and Technology, Coimbatore

B.Tech Information Technology — CGPA 8.23/10 (up to 5th SEM) | Year: 2027

Bishop Ubagarasamy Matric Hr. Sec. School, Tirupur

HSC Percentage: 85% | Year: 2023

SOFTWARE SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frontend: React.js, Vue.js, Redux, Responsive Design (Flexbox, CSS Grid), Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, FastAPI, REST API Development

Databases: MongoDB, MySQL, PostgreSQL, Supabase, Redis

Developer Tools: Git, GitHub, IntelliJ IDEA, VS Code, Postman, CI/CD Basics, Unit Testing

Core Competencies: Software Design & Development, API Development, Microservices, Distributed Systems, Clean Code, Debugging, Code Review, Performance Optimization, Data Structures & Algorithms, OOP, Problem Solving

Soft Skills: Communication, Logical Thinking, Collaborative Mindset, Quick Learner

PROJECTS

College Sphere — Multi-College Events Management System

🐙 [GitHub](#) · 🖱️ [Live Demo](#)

- Developed a full-stack MERN application enabling multi-college event management with centralized event creation, registration, and tracking. Implemented role-based authentication with secure access control. Designed responsive UI and optimized backend APIs for scalable multi-college support.

Tech Stack: React, Node.js, Express.js, OTP Authentication (with resend option), MongoDB, Cloudinary

SnapLink — Ultra-Optimized URL Shortener & Analytics | Full Stack

🐙 [GitHub](#) · 🖱️ [Live Demo](#)

- Built a full-stack MERN URL shortener with JWT authentication, custom short links, QR code generation, and an analytics dashboard.
- Improved performance using Redis caching, asynchronous click tracking, and bulk database updates for faster URL redirection.
- Added security features such as URL validation, rate limiting, reserved custom aliases, and soft deletion.

Tech Stack: MongoDB, Express.js, React.js, Node.js, Redis, QR Code Generator, Express Rate Limit

Chronicle — AI-Powered Code Decision Archaeology Tool

🐙 [GitHub](#) · 🖱️ [Live Demo](#)

- Developed a full-stack MERN + AI application that traces GitHub commit and PR history to explain why specific code was written, using a LangGraph-orchestrated multi-agent pipeline to extract, verify, and cite decision rationale.
- Built a staleness-verification agent that cross-checks past code decisions against the current codebase state, flagging outdated reasoning with confidence-scored, cited answers.
- Designed an interactive decision-timeline visualization and real-time agent progress streaming (Socket.io), with a vector-embedded knowledge base for fast retrieval across repo history, in a distributed multi-agent architecture.

Tech Stack: React, Vue, Redux, Node.js, Express.js, MongoDB, Python, FastAPI, LangGraph, LangChain, Socket.io, GitHub API, Chroma

CERTIFICATIONS

- Java Professional Course — Infosys Springboard
- Prompt Engineering — DeepLearning.AI
- Microsoft AI Fundamentals — Microsoft
