SUMMARY

Final-year IT student skilled in DSA, OOP, and full-stack development, with strong debugging and collaborative problem-solving ability.

EDUCATION

Sri Shakthi Institute of Engineering and Technology, Coimbatore

B.Tech Information Technology — CGPA 8.23/10 (up to 5th SEM) | Year: 2027

Bishop Ubagarasamy Matric Hr. Sec. School, Tirupur

HSC Percentage: 85% | Year: 2023

SOFTWARE SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks: Node.js, React.js, Express.js, Spring Boot

Databases: MongoDB, MySQL, Redis

Developer Tools: Git, GitHub, IntelliJ IDEA, VS Code, Postman, DSA, OOP, CI/CD basics, Version Control, Unit Testing

Core Competencies: Software Design, Software Development, Software Testing, Clean Code, Documentation, Code Review, Debugging, API Development, Microservices, Automation, Performance Optimization, Security, QA Validation, Continuous Integration, Data Structures and Algorithms, Object-Oriented Programming, Problem Solving

Soft Skills: Communication Skills, Logical Thinking, Collaborative Mindset, Quick Learner

CERTIFICATIONS

- Java Professional Course – Infosys Springboard
- Prompt Engineering – DeepLearning.AI
- Microsoft AI Fundamentals – Microsoft

PROJECTS

College Sphere – Multi-College Events Management System

- Developed a full-stack MERN application enabling multi-college event management with centralized event creation, registration, and tracking. Implemented role-based authentication with secure access control. Designed responsive UI and optimized backend APIs for scalable multi-college support.
- Tech Stack: React, Node.js, Express.js, OTP Authentication (with resend option), MongoDB, Cloudinary.

SnapLink – Ultra-Optimized URL Shortener & Analytics | Full Stack

- Built a full-stack MERN URL shortener with JWT authentication, custom short links, QR code generation, and an analytics dashboard.
- Improved performance using Redis caching, asynchronous click tracking, and bulk database updates for faster URL redirection.
- Added security features such as URL validation, rate limiting, reserved custom aliases, and soft deletion.
- Tech Stack: MongoDB, Express.js, React.js, Node.js, Redis, QR Code Generator, Express Rate Limit.

Parking Lot Management System | Console Application

- Developed a console-based parking management system to handle vehicle parking, slot allocation.
- Features include real-time vehicle entry/exit, dynamic slot assignment, vehicle tracking, and automated billing based on vehicle type and parking duration.
- Tech Stack: Java, OOP, Collections (HashMap, Queue).

AREA OF INTEREST

- Full Stack Development
- Backend Development
